SUMMARY

I'm a Frontend Developer with a passion for building clean, responsive, and accessible web applications. With experience in technologies like HTML, CSS, JavaScript, and modern frameworks such as React and Vue.js. My focus is on creating fast, accessible, and well-structured code while working closely with designers and backend developers to bring projects to life.

I care about user experience, performance, and writing code that's scalable and maintainable.

I'm also familiar with Git and modern frontend tools like Tailwind CSS.

I'm constantly learning and staying-up-to-date with the latest frontend trends, tools, and best practices to keep improving my craft.

WORK EXPERIENCE

HNG Tech Internship Remote Frontend engineer

2025- 2025

- Developed and maintained responsive user interfaces using HTML, CSS, and JavaScript, enhancing application usability and performance.
- Utilized React and Next.js to create dynamic and interactive web applications, focusing on clean and efficient code.
- Implemented modern styling frameworks such as Tailwind CSS and Bootstrap, ensuring consistent and appealing design across all devices.
- Collaborated with cross-functional teams to integrate frontend components with backend systems, providing seamless user experiences.
- Collaborated with a diverse team of developers on 5 major projects involving responsive web development
- Implemented a course management dashboard using React, improving user experience for both instructors and students
- - Developed a real-time collaborative note-taking application with React and Firebase, supporting simultaneous editing by multiple users here is it
- Developed user interfaces for 2 client-facing web applications using HTML, CSS, and JavaScript (next.js)

Simplilearn Professional course

2024- 2024

Frontend developer and Python

- I create modern, interactive user interfaces using HTML, CSS, JavaScript, and React.
- I specialize in building responsive websites that provide seamless user experiences across all devices, from mobile phones to desktop computers.
- Implemented modern styling frameworks such as Tailwind CSS and Bootstrap, ensuring consistent and appealing design across all devices
- Developed and maintained responsive user interfaces using HTML, CSS, and JavaScript, enhancing application usability and performance
- Used Git for version control, managing codebases, collaborating with team members, and tracking project progress
- Participated in user testing sessions and implemented feedback to improve usability
- Built an interactive event scheduling application with calendar integration, featuring reminder notifications
- I build complete web solutions from concept to deployment. Whether you need a business website e-commerce platform, or custom web application,
- I deliver fast, secure, and scalable websites that help grow your business. I develop robust backend solutions and web applications using Python. From API development and database management to automation scripts and data processing, create efficient server-side solutions that power your web applications.
